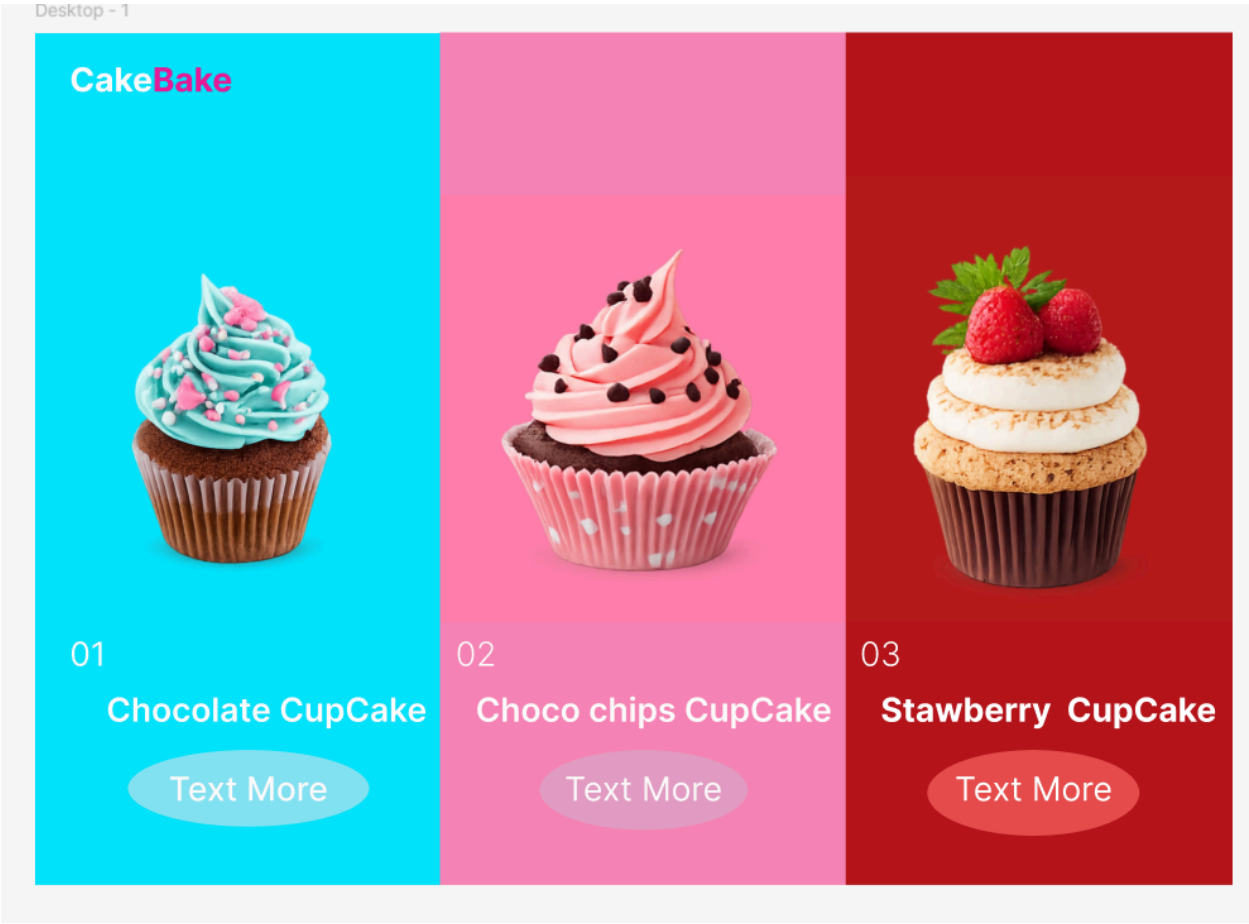
EXPERIMENT - 1

Name: Sruthi Dinesh
Roll No. : 240701536
Dept. : Computer Science and Engineering
Subject: User Interface Design
Subject Code: CS23A34



Identified Features & Drawbacks

1. Flat and Sectioned UI Appearance

- The webpage is divided into three solid color vertical sections (blue, pink, red), which makes the layout look rigid and overly segmented.
- There is no background depth, gradient, or visual layering, causing the interface to appear flat and less dynamic.
- The design lacks decorative elements or modern styling, reducing visual engagement.

2. Limited Visual Hierarchy

- The product numbers (01, 02, 03) are small and do not stand out clearly.
- The cupcake titles and other text elements have similar font weight, creating weak differentiation between important and secondary information.
- The brand name “CakeBake” is placed at the top but does not dominate strongly as a focal point.

3. Basic Button Styling

- The “Text More” buttons are simple oval shapes with very light contrast.
- They do not strongly attract user attention and lack a clear call-to-action emphasis.
- The buttons blend into the background instead of standing out.

4. Colour Contrast and Readability Issues

- Some sections use light text on bright backgrounds, slightly reducing readability.
- The heavy use of bold solid colours without variation can strain the eyes.

- There is minimal variation in typography size and style.

5. Repetitive Layout Structure

- All three cupcake sections follow the exact same layout pattern without variation.
- While consistent, this makes the page predictable and less visually interesting.
- There is no interactive or highlighted featured product.

6. Limited Navigation and Content Depth

- The page mainly focuses on product display without navigation options (such as Home, About, Contact).
- There is no promotional section, offer highlight, or additional content to enhance engagement.
- The layout appears more like a static poster than a fully functional website homepage.

7. Minimal Spacing and Modern UI Elements

- The design lacks layered elements, shadows, gradients, or overlapping components.
- The overall composition feels basic compared to modern website standards

Good website

1. Attractive Thematic Background Design

- Each page (Strawberry – pink, Blueberry – purple, Chocolate – brown) uses a flavour-based colour theme, creating strong visual identity and brand consistency.

- The curved background shapes on the right side add depth and modern styling, making the website visually engaging instead of flat.

- The bold gradient backgrounds enhance aesthetic appeal and make the homepage look dynamic and professional.

2. Strong Brand Identity (CutieCake Header)

- The large, bold “CutieCake” logo at the top creates immediate brand recognition.

- The font size and white colour contrast effectively against darker backgrounds, improving visibility and hierarchy.

3. Improved Navigation Bar

- The navigation menu (Home, About, Privacy, Contact) is clearly placed at the top right.
- The spacing between menu items improves readability and usability.
- The navigation layout follows standard website conventions, making it intuitive for users.

4. Clear Visual Hierarchy

- The flavour name (Strawberry, Blueberry, Chocolate) is displayed prominently below the brand name, acting as a clear section heading.
- Important promotional text like “Special 20% off” is highlighted using a starburst shape and bold font, immediately drawing user attention.
- Larger cupcake images on the right side create a strong focal point.

5. High-Quality Product Display

- A large featured cupcake image is displayed prominently on the right side, emphasizing the selected flavour.
- Smaller cupcake thumbnails (Strawberry, Blueberry, Chocolate) are arranged neatly below, offering clear product variety.
- Images are consistent in size and alignment, improving structure and visual balance.

6. Effective Use of Colour and Contrast

- Each theme uses contrasting text colours to maintain readability against bold backgrounds.
- The promotional badge (pink star with black text) stands out clearly from the background.

- White and light-toned fonts are used strategically for better clarity.

7. Promotional Emphasis (Call-to-Action Strategy)

- The “Special 20% off” badge works as a visual call-to-action element.
- The promotional message about Valentine’s Day enhances emotional appeal and marketing effectiveness.
- The layout directs attention from brand → flavour → product image → offer, following a logical user flow.

8. Structured Layout and Alignment

- The content is divided into clear sections: header, product highlight, flavour options, and promotional text.
- Proper spacing and alignment prevent clutter.
- The layout balances text and images effectively, creating a professional and user-friendly interface.
