EXPERIMENT - 8

Aim:

The aim is to create storyboards representing the user flow for a mobile grocery shopping app using Balsamiq Wireframes.

User Flow

1. **Homepage** – Users can browse featured grocery sections, search for products, and access categories like Fruits, Vegetables, Pantry, and Ready to Eat.
2. **Fresh Fruits Screen** – Displays different fruits in grid format such as Apple, Papaya, Banana, Pineapple, Avocado, and Strawberries.
3. **Product Details Screen** – Detailed view of a selected fruit with image, product name, rating, short description, Buy Now, Add to Cart, and Wishlist options.
4. **Checkout Screen** – Shows payment methods such as UPI/Internet Banking, Credit/Debit Card, and Cash on Delivery with a Place Order button.
5. **Order Confirmation Screen** – Displays successful order placement message with an option to Track Order.

Homepage

Components:

- Search bar
- Promotional banner / featured product area
- Category icons with labels: Fresh Fruits, Fresh Veggies, Pantry, Ready to Eat
- Navigation back icon

Purpose:

Acts as the main entry point where users can explore grocery categories and quickly start shopping.

Fresh Fruits Screen

Components:

- Search bar
- Title: Fresh Fruits
- Grid layout of fruit products
- Product images with names below each item
- Back navigation icon

Purpose:

Allows users to browse and select fruits from the available collection.

Product Details Screen

Components:

- Large product image
- Product name: Avocado
- Star rating system
- Product description box
- Buy Now button
- Add to Cart button
- Wishlist button
- Back navigation icon

Purpose:

Provides complete product details so users can make a purchase decision.

Checkout Screen

Components:

- Title: Checkout
- Payment method options:
    - UPI / Internet Gateway
    - Credit Card / Debit Card
    - Cash on Delivery
- Place Order button
- Back navigation icon

Purpose:

Allows users to choose payment methods and confirm their purchase.

Order Confirmation Screen

Components:

- Success icon (green tick mark)
- Message: Order Successfully Placed!
- Track Order button
- Back navigation icon

Purpose:

Confirms successful order placement and allows users to track delivery status.
